SR GROUP

SINCE 1985

BUILDING TRUST. DELIVERING STRENGTH. SINCE 1985.

Integrated Construction Material, Logistics & Concrete Solutions

WHY SR GROUP

In construction, a supply chain failure ripples across an entire project. Choosing a material partner is a crucial risk management decision.

Four decades of operations have enabled our organisation with the infrastructure, technical depth and accountability to serve demanding construction programmes. Integrating cement, logistics, RMC and captive batching under one roof means a developer who engages SR Group never has to look elsewhere.

The evidence is in the project portfolio. SR Group currently supplies concrete for Hyderabad's most significant residential developments, from Financial District high-rises to luxury villa communities on the city's growth corridors.

SR GROUP AT A GLANCE

Four decades at the heart of construction supply in Telangana. The numbers below represent forty years of daily execution, accumulated relationships and infrastructure

Our Impact

- **40+** Years of Industry Experience
- **6+** Leading Cement Brands
- **120+** Transport Vehicles
- **24X7** Operations and Support
- **5** Operational Batching Plants
- **1000+** Projects and Customers Served

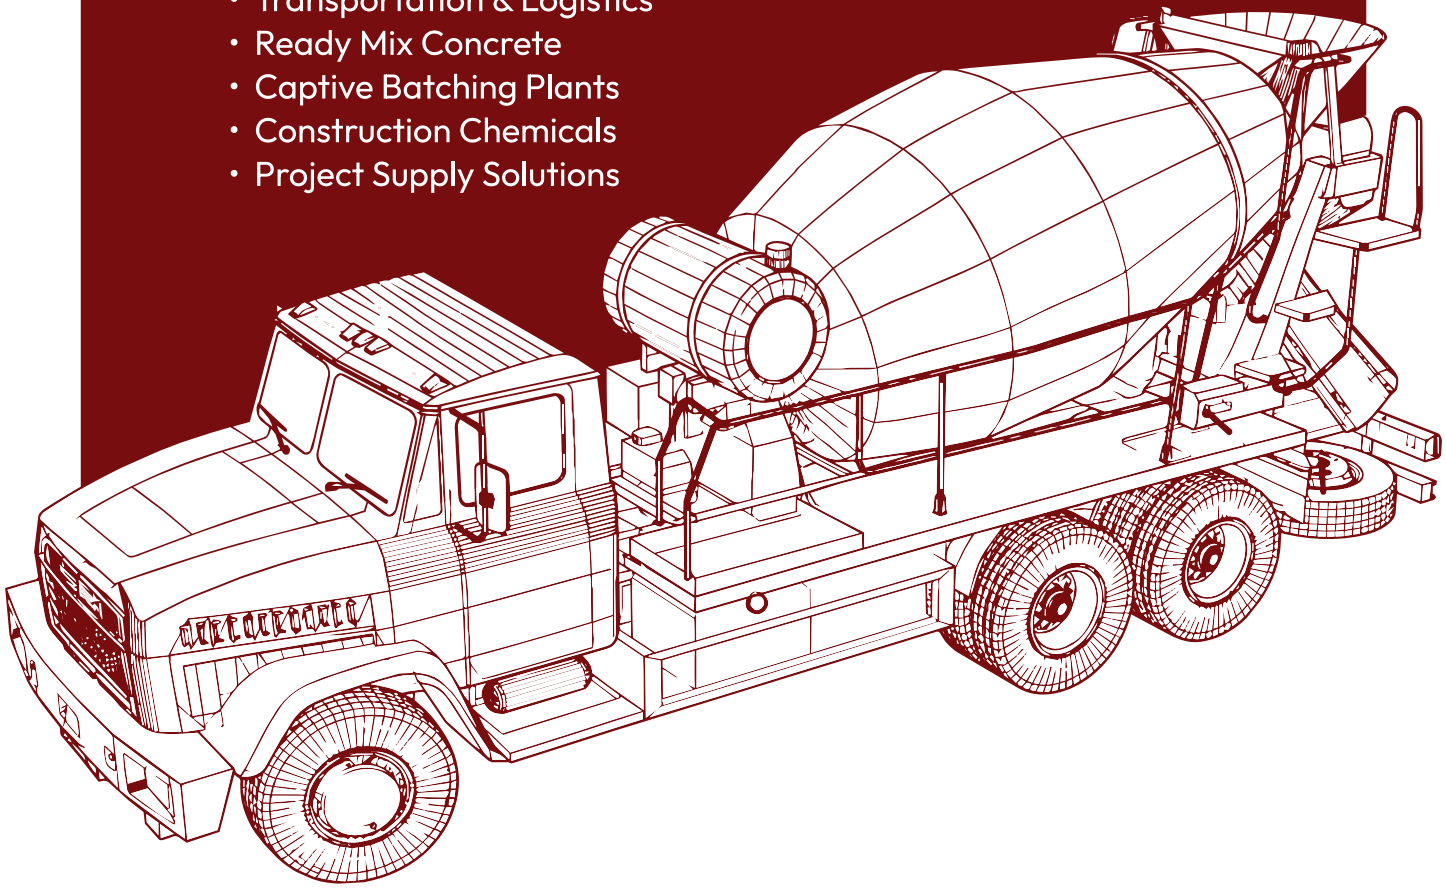

OUR INTEGRATED ECOSYSTEM

Most construction projects in India run on a fragmented supply model: cement, transport, ready mix concrete and construction chemicals from different vendors. Each handoff is a point of risk. When something goes wrong, accountability dissolves between them.

SR Group was built to solve that, expanding into a fully integrated construction material ecosystem with six verticals, one management team and one accountable partner.

THE SIX VERTICALS OF SR GROUP:

- Cement Distribution
- Transportation & Logistics
- Ready Mix Concrete
- Captive Batching Plants
- Construction Chemicals
- Project Supply Solutions

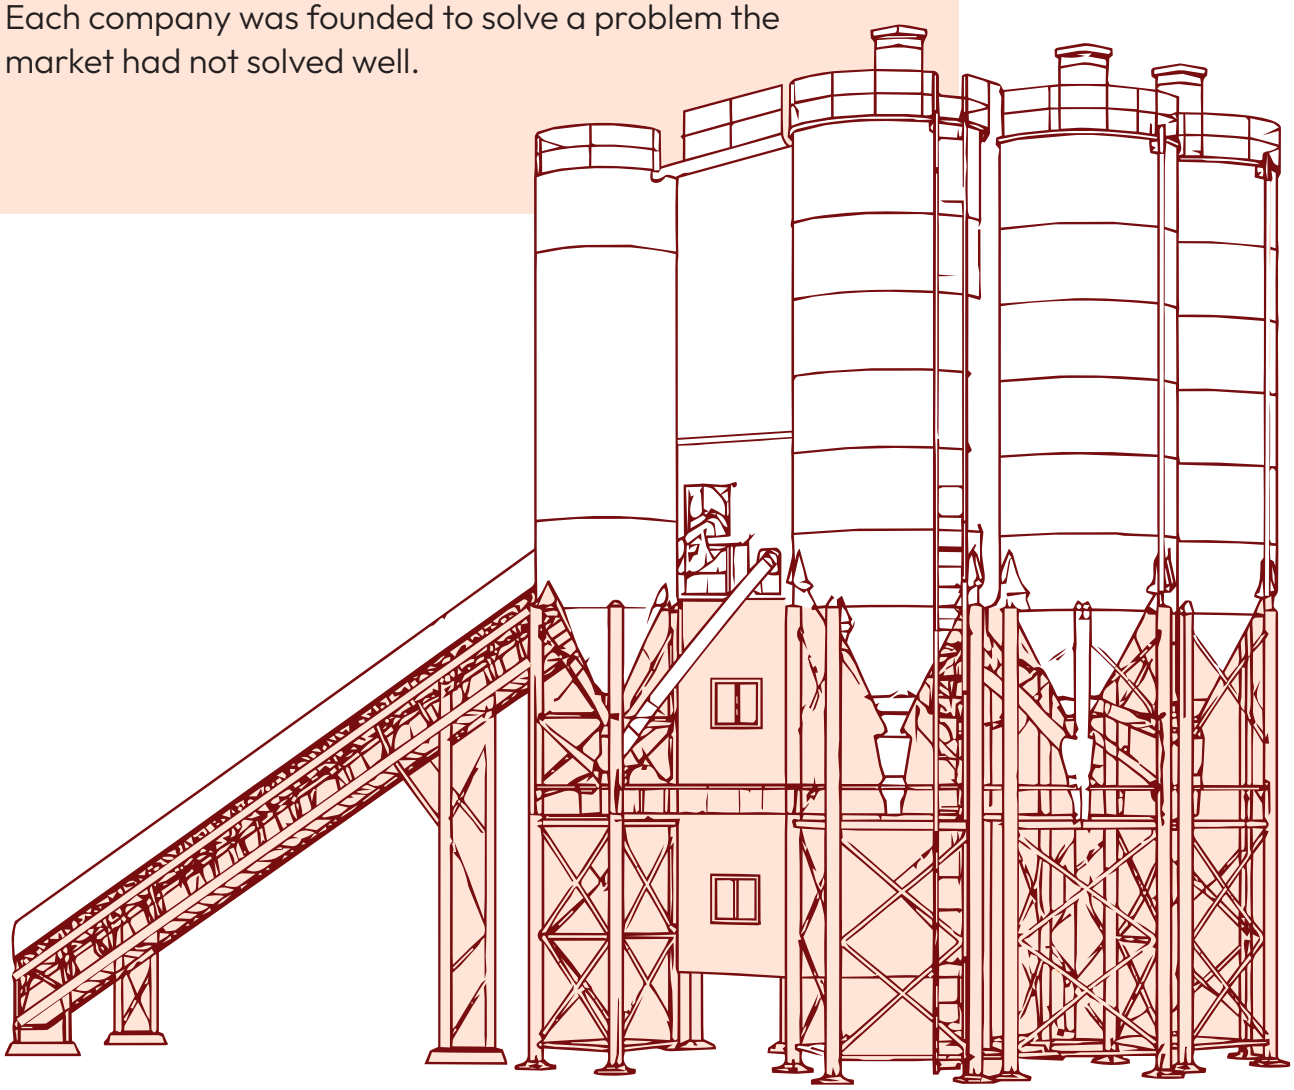

SR GROUP

SINCE 1985

OUR JOURNEY

Every vertical was built organically, in response to an operational need identified through years of working with builders, developers and contractors across Telangana and **Andhra Pradesh.**

Each company was founded to solve a problem the market had not solved well.

FOUR DECADES OF CONTINUOUS GROWTH AND INDUSTRY LEADERSHIP

1985

Sri Kamakshi Cement Agencies

The Foundation: Established as an authorised distributor of premium cement brands.

Built four decades of trusted supply across **Telangana** and **Andhra Pradesh** on the twin pillars of product authenticity and reliable delivery.

2000

Sri Vaishnavi Transport

The Backbone: Brought logistics entirely in-house to eliminate third-party delivery risk.

Grew steadily into a **120+ vehicle operation** covering bulk and bagged cement movement and full construction material logistics.

2024

Kamakshi RMC

The Concrete Leap: Launched a QCI-certified commercial batching plant at **Gandimaisamma**, entering the ready mix concrete market with full-range capability from M10 to M80+ and a dedicated on-site QC laboratory.

2025

PR BuildTech

The Developer Partner: Established captive batching plant solutions for large-scale developers.

On-site concrete production eliminates transit risk and enables 24x7 supply aligned to the project's pour schedule.

SR GROUP

SRI KAMAKSHI CEMENT AGENCIES

Established 1985 | Authorised Dealer & Distributor.

SRI KAMAKSHI CEMENT AGENCIES
SINCE 1985

Sri Kamakshi Cement Agencies is the founding enterprise of SR Group. Established in 1985, SKCA began as an authorised dealer for premium cement brands and has grown into one of the primary cement distributors serving builders and contractors across **Telangana** and **Andhra Pradesh.**

Every order is fulfilled through an in-house logistics fleet from a warehouse network ensuring consistent stock availability and an unbroken supply chain from manufacturer to site. SKCA holds authorised dealerships for six of India's leading cement manufacturers, so clients can source whichever brand their structural engineer specifies.

Product Categories

Cement & Structural Products	Finishing, Chemical & Waterproofing Products
Ordinary Portland Cement (OPC)	White Cement & Wall Putty
Portland Pozzolana Cement (PPC)	Tile Adhesives
Portland Slag Cement (PSC)	Block Joining Mortars
Bulk Cement (bagged and loose)	Waterproofing Solutions
	Construction Chemicals

Authorised Brands

RAMCO SUPERGRADE — As strong as family bonds.

Zuari Cement — HEIDELBERGCEMENT Group

DECCAN CEMENTS LIMITED

Bharathi CEMENT

Chettinad cement

JSW Cement — The Leaders' Choice

Delivering genuine, authorised-source cement across Telangana.

SRI VAISHNAVI TRANSPORT

SR GROUP

SRI VAISHNAVI TRANSPORT

Established 2000 | Reliable Logistics. On-Time Delivery.

SR Group resolved third-party delivery risk in 2000 by founding **Sri Vaishnavi Transport** and bringing logistics fully in-house.

The division now operates a **120+ vehicle fleet** serving construction material movement across Telangana. Every vehicle is **GPS-tracked**, every delivery logged, and critical project accounts are served by dedicated fleet allocations. On-time delivery is an inherent part of infrastructure, not just a promise.

Fleet Strength

120+ Transport Vehicles Equipped with GPS Tracking..

Operations

- **Bulk Cement Transportation:** Direct silo-to-silo delivery via cement bulker fleet, timed to batching plant production schedules
- **Bagged Cement Transportation:** Full-load and part-load deliveries to project sites, retail dealers and distribution points across Telangana
- **Construction Material Movement:** Aggregates, construction chemicals, waterproofing and ancillary supplies
- **Project Logistics Support:** Scheduled, priority deliveries aligned to the project's pour and construction programme

Uninterrupted supply chain support from warehouse to project site.

KAMAKSHI RMC
MIXING QUALITY * DELIVERING STRENGTH

SR GROUP

KAMAKSHI RMC

Established 2024
Commercial Ready Mix Concrete Plant.

The launch of Kamakshi RMC in 2024 marked SR Group's entry into ready mix concrete and the group's most significant single investment.

The QCI-certified plant at **Gandimaisamma** is fully automated with cement silos, a transit mixer fleet, GPS dispatch and an on-site QC laboratory. **Capability spans M10 to M80+ including Self-Compacting Concrete and custom mix designs.**

Concrete Mix Solutions

Concrete Grade / Type	Typical Application
Standard Concrete: M10 to M40	Foundations, columns, beams and slabs for residential and commercial construction
High-Strength Concrete: M40 to M80	High-rise columns, transfer structures, podium slabs and prestressed elements
Self-Compacting Concrete (SCC)	Densely reinforced sections and complex architectural elements.
Smart Dynamic Concrete (SDC)	Large-volume continuous pours with advanced workability retention
Fibre Reinforced Concrete	Industrial floors, pavements and precast elements
Temperature-Controlled Concrete	Mass concrete and hot-weather placements
Pumpable Concrete	High-rise slab construction via boom pump
Lightweight & Specialised Concrete	Custom mixes to specific project requirements

Experience. Infrastructure. Execution.

QUALITY FLOW

- Raw Material Testing
- Automated Batching
- QC Testing
- Transit Monitoring
- Site Delivery

PR BUILD TECH
ENGINEERING CONCRETE SOLUTIONS
KAMAKSHI GROUP

SR GROUP

PR BUILDTECH

Established 2025 | Captive Batching Plant Sol

PR BuildTech establishes captive batching plants on or adjacent to large developer sites, eliminating transit risk and enabling **24x7 Concrete Supply** to the project's pour schedule.

PR BuildTech manages everything from site survey through plant positioning, civil works, installation, trial mixes and commissioning. A resident team of concrete technologist, QC engineers and plant operators manages production throughout the project.

Zero transit risk, capacity calibrated to the pour schedule, and every cubic metre produced, tested and delivered by one accountable team.

Concrete Mix Solutions

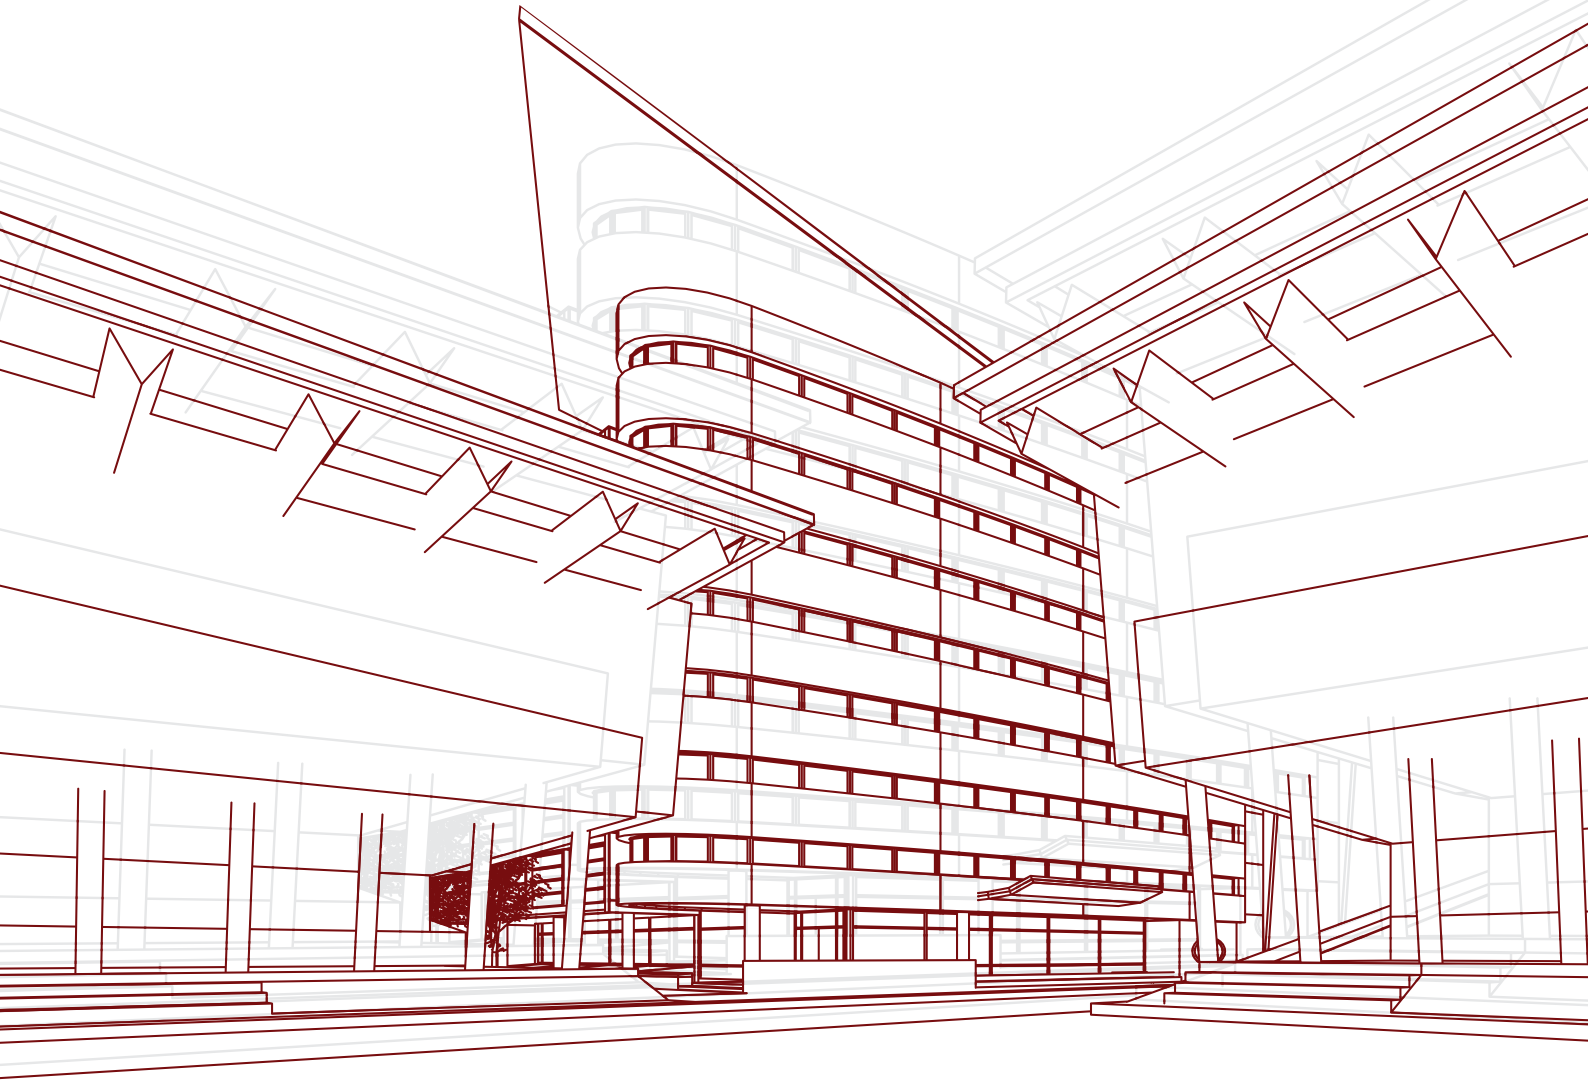

Project	Developer	Site Location	Scale
RAGHAVA CINQ	**Raghava Highrise Projects**	Financial District, Hyderabad.	5 Towers 61 Floors each
NOVA by RAGHAVA	**Bluestone Projects**	Financial District, Hyderabad.	2 Towers 61 Floors each
LANSUM EVANA NATURE LIVES HERE	**Lansum Properties**	Chevella, Ranga Reddy.	Luxury Villa Community
PRESTIGE GOLDEN GROVE	**L&T Constructions**	Tellapur, Hyderabad.	10 Towers 2B+3P+52 Floors

PROJECT EXECUTION CAPABILITIES

At SR Group's scale, delivery requires a structured project model ranging from a bagged cement programme to a captive batching plant for a **61 Floor High-Rise**.

That model has been developed over decades with developers and EPC contractors across Telangana.

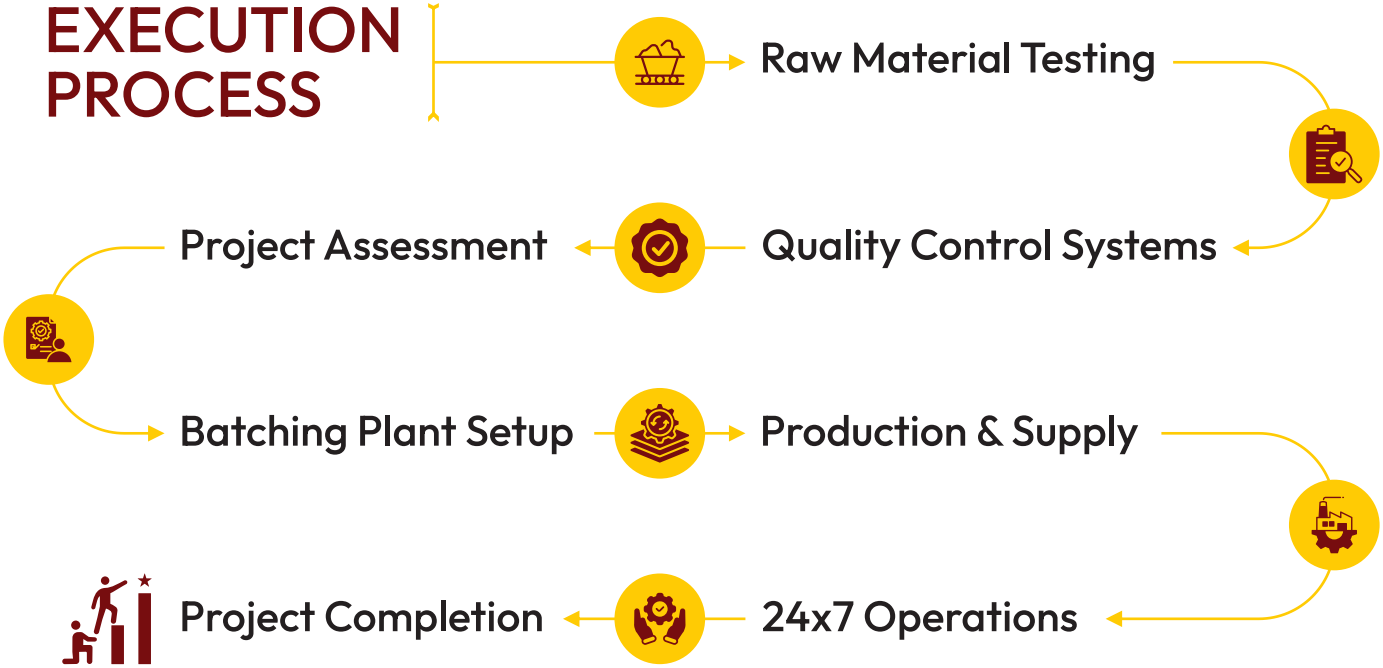

Every engagement begins with a dedicated assessment, not a standard quotation. The team reviews specifications, pour sequence and logistics constraints before committing, achieving zero supply-related stoppages across complex projects.

CAPABILITY HIGHLIGHTS

- **Dedicated Plant Infrastructure**: purpose-built or captive batching plants commissioned to project specifications before the first pour
- **Experienced Technical Team**: civil engineers, QC technicians and certified concrete technologists resident at every active site
- **On-Site Quality Support**: continuous slump testing, cube testing and fresh concrete monitoring for every truck
- **Project-Specific Mix Design**: custom mix proportions developed, trialled and validated against the structural specification before production commences
- **Continuous Production Support**: multi-shift operations covering night pours, weekend placements and critical programme milestones

EXECUTION PROCESS

Right Mix. Right Quantity. Right Time.
